The information in this Supplement amends certain information contained in the Fund’s Prospectus, Summary Prospectus, and Statement of Additional Information, each dated September 1, 2019, as supplemented.

The Board of Trustees of Strategy Shares has concluded that it is in the best interests of Strategy Shares US Market Rotation Strategy ETF (the “Fund”) and its shareholders that the Fund cease operations.

Effective immediately, the Fund will no longer pursue its stated investment objective and the Fund will begin liquidating its portfolio. While the Fund is preparing to liquidate, the Fund will hold cash and cash equivalents and will not engage in any business activities except for the purpose of winding up its business affairs, preserving the value of its assets, discharging or making reasonable provision for the payment of all its liabilities, and liquidating and distributing its remaining assets to the shareholders of the Fund.

After the close of business on April 20, 2020, the Fund will no longer accept creation or redemption orders. The last day of trading for the Fund on NYSE Arca, Inc. (the “Exchange”) is expected to be April 20, 2020 (the “Cessation Date”).

Shareholders may sell their shares of the Fund on the Exchange until market close on the Cessation Date and may incur typical transaction fees from their broker-dealer. The Fund’s shares will no longer trade on the Exchange after market close on the Cessation Date, and the shares will be subsequently delisted. Shareholders who do not sell their shares of the Fund before market close on the Cessation Date will receive cash equal to the amount of the net asset value of their shares, which will include any capital gains and dividends, in the cash portion of their brokerage accounts, on or about April 24, 2020. Shareholders generally will recognize a capital gain or loss equal to the amount received for their shares over their adjusted basis in such shares. Shareholders should consult their tax advisers regarding the effect of the Fund’s liquidation in light of their individual circumstances.

If you have questions or need assistance, please contact the Fund at 1-(855) 4SS-ETFS or 1-(855) 477-3837.

Strategy Shares US Market Rotation Strategy ETF
NYSE Arca Ticker: HUSE

SUMMARY PROSPECTUS
SEPTEMBER 1, 2019

Before you invest, you may want to review the Fund’s complete prospectus, which contains more information about the Fund and its risks. You can find the Fund’s prospectus and other information about the Fund at http://strategysharesetfs.com/literature-forms/. You can also get this information at no cost by calling 1-855-HSS-ETFS or (855) 477-3837, emailing info@strategysharesetfs.com or by asking any financial intermediary that offers shares of the Fund. The Fund’s prospectus and statement of additional information, both dated September 1, 2019, are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website or phone number noted above.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Strategy Shares’ shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on http://strategysharesetfs.com, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change; and you need not take any action. You may elect to receive shareholder reports and other communications from your financial intermediary electronically by notifying your financial intermediary directly.

You may elect to receive all future reports in paper free of charge. You can contact your financial intermediary to request that you continue to receive paper copies of your reports. Your election to receive reports in paper will apply to all funds held with your financial intermediary.
**Investment Objective:** The Fund’s investment objective is to seek long-term capital appreciation.

**Fees and Expenses:** This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. If you purchase or sell shares of the Fund in the secondary market through your financial institution, your financial institution may assess brokerage commissions or other charges to process the transactions.

<table>
<thead>
<tr>
<th>Shareholder Fees (fees paid directly from your investment)</th>
<th>None</th>
</tr>
</thead>
<tbody>
<tr>
<td>Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)</td>
<td></td>
</tr>
<tr>
<td>Management Fee</td>
<td>0.60%</td>
</tr>
<tr>
<td>Distribution and/or Service Fee (12b-1) Fees</td>
<td>0.00%</td>
</tr>
<tr>
<td>Other Expenses(^{(1)})</td>
<td>0.31%</td>
</tr>
<tr>
<td>Acquired Fund Fees and Expenses(^{(2)})</td>
<td>0.29%</td>
</tr>
<tr>
<td>Total Annual Operating Expenses</td>
<td>1.20%</td>
</tr>
</tbody>
</table>

\(^{(1)}\) Reflects the 0.15% recoupment by the advisor of fees and expenses previously waived/reimbursed by the advisor in accordance with the terms of the expense limitation agreement in effect at the time of the waiver/reimbursement.

\(^{(2)}\) Acquired Fund Fees and Expenses are the indirect costs of investing in other investment companies. The total annual fund operating expenses in this fee table will not correlate to the expense ratio in the Fund’s Financial Highlights because the financial statements include only the direct operating expenses incurred by the Fund, not the indirect costs of investing in other investment companies.

**Example:** This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest $10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. This Example does not reflect the effect of brokerage commissions or other transaction costs you pay in connection with the purchase or sale of Fund shares. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same and the expense reduction/reimbursement remains in place for the contractual period only. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<table>
<thead>
<tr>
<th></th>
<th>1 Year</th>
<th>3 Years</th>
<th>5 Years</th>
<th>10 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>$122</td>
<td>$381</td>
<td>$660</td>
<td>$1,455</td>
</tr>
</tbody>
</table>

**Portfolio Turnover:** The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. The Fund’s portfolio turnover rate was 3.537% of the average value of its portfolio for the fiscal year ending April 30, 2019.

**Principal Investment Strategy**

The Fund is an actively managed exchange-traded fund (“ETF”) that, under normal conditions, will invest primarily in U.S. common stock, ETFs and exchange traded notes (“ETNs”). Under normal circumstances, at least 80% of the Fund’s net assets, plus any borrowings for investment purposes, will be invested in securities of U.S. companies and/or the U.S. government, or in other investment companies that principally invest in such securities. The Fund may also invest in foreign companies traded on a U.S. exchange (including American Depositary Receipts). The Fund’s portfolio is composed of two components: (i) the common stock component and (ii) the tactical component. The Fund’s assets may be invested in either of these two components without limit.

*The Common Stock Component.*

The Common Stock Component of the Fund’s portfolio will invest in companies within each of the large-cap, mid-cap and small-cap U.S. equity segments (each a “Market Segment”) that operate in each of the sectors represented in the S&P Composite 1500®. A sector is a large grouping of companies operating within the market that share similar characteristics. As of the date of the prospectus, the sectors comprising the S&P Composite 1500® are: communications services, consumer discretionary, consumer staples, energy, health care, industrials, information technology, financials, materials, real estate, and utilities (“Sectors”). The S&P Composite 1500 is comprised of the S&P 500®, the S&P MidCap 400® and S&P SmallCap 600®.
As market conditions change, the Fund intends to rotate the investment focus of the Fund so as to overweight its portfolio in companies comprising those Market Segments and Sectors that the Sub-Advisor believes offer the greatest potential for capital appreciation in the given market environment and underweight its portfolio in those Market Segments and Sectors that the Sub-Advisor believes offer the least potential for capital appreciation in that same market environment. Due to the tactical nature of the Fund's investment strategy, the Fund may have no exposure to a particular Market Segment or Sector. If the Fund’s portfolio allocation to a particular Market Segment or Sector exceeds that Market Segment’s or Sector’s current weighting in the S&P Composite 1500, then the Fund will be “overweighting” that Market Segment or Sector. Similarly, if the Fund’s portfolio allocation to a specific Market Segment or Sector is less than that Market Segment’s or Sector’s current weighting in the S&P Composite 1500, then the Fund will be “underweighting” that Market Segment or Sector. The Sub-Advisor believes that these adjustments, collectively, may offer the potential to position the Fund for continued capital appreciation in various market environments.

The Common Stock Component of the Fund’s portfolio is created using two proprietary quantitative strategies. The first strategy identifies and evaluates various factors including value, momentum, smart money (e.g., tracking insider and institutional buying and selling), profitability, trading friction (e.g., volume, price and beta) and growth. The second strategy utilizes a multi-factor model which analyze earnings, technical factors, valuations and industry leadership.

The Sub-Advisor retains a broad mandate and discretion to invest in companies consistent with its evaluation of the capital appreciation potential of the Market Segments and Sectors. The strategy of overweighting and underweighting Sectors to maximize opportunities for capital appreciation may result in the Fund investing greater than 25% of its total assets in the equity securities of companies operating in one or more Sectors. Sectors are comprised of multiple individual industries. The Fund will not invest more than 25% of its total assets in an individual industry.

Both in current market conditions and, more importantly, over longer time periods, the Sub-Advisor believes that investing in companies consistent with its ongoing evaluation of the capital appreciation potential of the Market Segments and Sectors is intrinsic to maximizing performance in the domestic equity markets.

**The Tactical Component**

The Tactical Component of the Fund’s portfolio invests in actively managed or index equity-based ETFs and ETNs. This portion of the Fund’s portfolio may also invest in treasury, fixed income and volatility ETFs and ETNs. The Fund may invest in fixed income ETFs and ETNs that principally invest in investment grade securities of any duration or maturity. Duration is a measure used to determine the sensitivity of a security’s price to changes in interest rates. The longer a security’s duration, the more sensitive it will be to changes in interest rates. For example, if a bond has a duration of 5 years, a 1% rise in rates would result in a 5% decline in price. If a bond has a duration of 10 years, a 1% rise in interest rates would result in a 10% decline in price. The goal of this component of the Fund’s portfolio is to be opportunistic during market rallies and move into defensive positions during market declines through the use of three tactical strategies:

- Trend Following---The trend following models seek to identify strong Sectors to buy and weak Sectors to sell. Trend following is based on the idea that strong areas of the market will remain strong and weak areas will remain weak.
- Mean Reversion---The mean reversion models look for strong Sectors that appear overbought to sell and weak Sectors that appear oversold to buy. Mean reversion is based on the idea that Sectors often become overextended on the upside and downside before ultimately snapping back to equilibrium.
- Intermarket Analysis---These models will analyze Sectors that are correlated or uncorrelated and look for divergences. These divergences often signal major market turning points.

The Fund actively trades its portfolio securities in an attempt to achieve its investment objective which may lead to higher transaction costs that may affect the Fund’s performance.

**Principal Investment Risks**

As with any ETF, there is no guarantee that the Fund will achieve its objective. Investment markets are unpredictable and there will be certain market conditions where the Fund will not meet its investment objective and will lose money. The Fund’s net asset value, market price and returns will vary and you could lose money on your investment in the Fund and those losses could be significant.
An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

The following summarizes the principal risks of investing in the Fund. These risks could adversely affect the net asset value, market price, total return and the value of the Fund and your investment. These risks affect the Fund directly as well as through the ETFs in which it invests.

**Active Trading Risk.** The Fund may trade securities actively, which could increase its transaction costs (thereby lowering its performance) and could increase the amount of taxes you owe by generating short-term gains, which may be taxed at a higher rate. The Fund anticipates turnover to be significantly in excess of 100% and considerably higher than that of other funds.

**Authorized Participant Risk.** The Fund has a limited number of financial institutions that may act as Authorized Participants. An “Authorized Participant” is a participant in the Continuous Net Settlement System of the National Securities Clearing Corporation or the Depository Trust Company (“DTC”) and that has executed a Participant Agreement with the Fund’s distributor (“Distributor”). To the extent these Authorized Participants exit the business or are unable to process creation and/or redemption orders and no other Authorized Participant is able to step forward to process creation and/or redemption orders, in either of these cases, shares of the Fund may trade like closed-end fund shares at a discount to NAV and possibly face delisting.

**Equity Securities Risk.** The net asset value and market price of the Fund will fluctuate based on changes in the value of the U.S. and/or foreign equity securities held by the Fund. Equity prices can fall rapidly in response to developments affecting a specific company or industry, or to changing economic, political or market conditions.

**ETF Structure Risks.** The Fund is structured as an ETF and as a result is subject to the special risks, including:

- **Not Individually Redeemable.** Shares are not individually redeemable and may be redeemed by the Fund at NAV only in large blocks known as “Creation Units.” You may incur brokerage costs purchasing enough Shares to constitute a Creation Unit. Fund shares are typically bought and sold in the secondary market and investors typically pay brokerage commissions or other charges on these transactions.

- **Trading Issues.** Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange. An active trading market for the Fund’s shares may not be developed or maintained. If the Fund’s shares are traded outside a collateralized settlement system, the number of financial institutions that can act as authorized participants that can post collateral on an agency basis is limited, which may limit the market for the Fund’s shares.

- **Market Price Variance Risk.** The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a “bid-ask spread” charged by the exchange specialists, market makers or other participants that trade the particular security. There may be times when the market price and the NAV vary significantly. This means that Shares may trade at a discount to NAV.
  - In times of market stress, market makers may step away from their role market making in shares of ETFs and in executing trades, which can lead to differences between the market value of Fund shares and the Fund’s net asset value.
  - The market price for the Fund’s shares may deviate from the Fund’s net asset value, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Fund shares than the Fund’s net asset value, which is reflected in the bid and ask price for Fund shares or in the closing price.
  - When all or a portion of an ETFs underlying securities trade in a market that is closed when the market for the Fund’s shares is open, there may be changes from the last quote of the closed market and the quote from the Fund’s domestic trading day, which could lead to differences between the market value of the Fund’s shares and the Fund’s net asset value.
  - In stressed market conditions, the market for the Fund’s shares may become less liquid in response to the deteriorating liquidity of the Fund’s portfolio. This adverse effect on the liquidity of the Fund’s shares may, in turn, lead to differences between the market value of the Fund’s shares and the Fund’s net asset value.

**ETN Risk.** The value of an ETN may be influenced by time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in underlying markets, changes in the applicable interest rates, changes in the issuer’s credit rating and economic, legal, political or geographic events that affect the referenced commodity. The value of the ETN may drop due to a downgrade in the issuer’s credit rating, even if the underlying index remains unchanged. Investments in ETNs are subject to the risks facing income securities in general including the risk that a counterparty will fail to make payments when due or default. Owning an ETN generally reflects
the risks of owning the assets that comprise the underlying market benchmark or strategy that the ETN is designed to reflect. ETNs also are subject to issuer and fixed-income risk.

**Fixed Income Securities Risk.** When the Fund invests in fixed income securities, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned by the Fund. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Recently, interest rates have been historically low and interest rate risk may be heightened. Other risk factors include credit risk (the debtor may default). Lowered credit ratings may cause a drop in a fixed income security’s price and are associated with greater risk of default on interest and principal payments. Certain fixed income securities may be paid off early when the issuer can repay the principal prior to a security’s maturity. If interest rates are falling, the Fund may have to reinvest the unanticipated proceeds at lower interest rates, resulting in a decline in the Fund’s income. If interest rates rise, repayments of principal on certain fixed income securities may occur at a slower rate than expected and the expected maturity of those securities could lengthen as a result, which reduces the Fund’s ability to reinvest at higher rates. These risks could affect the value of a particular investment by the Fund, possibly causing the Fund's share price and total return to be reduced and fluctuate more than other types of investments.

**Foreign Investment Risk.** Investments in foreign securities tend to be more volatile and less liquid than investments in U.S. securities because, among other things, they involve risks relating to political, social and economic developments abroad, as well as risks resulting from differences between the regulations and reporting standards and practices to which U.S. and foreign issuers are subject. To the extent foreign securities are denominated in foreign currencies, their values may be adversely affected by changes in currency exchange rates.

**Information Technology Sector Risk.** Information technology companies face intense competition and potentially rapid product obsolescence. They are also heavily dependent on intellectual property rights and may be adversely affected by the loss or impairment of those rights.

**Investment Style Risk.** The type of securities in which the Fund focuses may underperform other assets or the overall market.

**Large-Cap Stock Risk.** The Fund’s investment in larger companies is subject to the risk that larger companies are sometimes unable to attain the high growth rates of successful, smaller companies, especially during extended periods of economic expansion; and may be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.

**Management Risk.** The Sub-Advisor's reliance on its rotation strategy and related judgments about the value and potential appreciation of securities in which the Fund invests may prove to be incorrect. The Advisor’s assessment of the Sub-Advisor’s investment acumen may prove incorrect. The Sub-Advisor's reliance on its tactical strategy and related judgments about the value and potential appreciation of securities in which the Fund invests may prove to be incorrect. Reliance on these investment strategies and the models they rely on may expose the Fund to downward trends and/or market volatility and may not achieve immediate exposure to upward trends. The Advisor and Sub-Advisor may not successfully implement the Fund’s investment strategies and, as a result, the Fund may not meet its investment objective and/or underperform other investment vehicles with similar investment objectives and strategies.

**Market Risk.** The value of securities in the Fund’s portfolio will fluctuate and, as a result, the Fund’s NAV or market price per share may decline suddenly or over a sustained period of time. Factors such as domestic and foreign economic growth rates and market conditions, interest rate levels and political events may adversely affect the securities markets.

**Mid/Small-Cap Stock Risk.** The earnings and prospects of small and medium sized companies are more volatile than larger companies and may experience higher failure rates than larger companies. Small and medium sized companies normally have a lower trading volume than larger companies, which may tend to make their market price fall more disproportionately than larger companies in response to selling pressures and may have limited markets, product lines, or financial resources and lack management experience.

**Model and Data Risk.** Like all quantitative analysis, the investment models utilized by the Advisor and Sub-Advisor carry the risk that the ranking system, valuation results and predictions might be based on one or more incorrect assumptions, insufficient historical data, inadequate design, or may not be suitable for the purpose intended. In addition, models may not perform as intended for many reasons including errors, omissions, imperfections or malfunctions. Because the use of models are usually constructed based on data supplied by third parties, the success of the Advisor’s and Sub-Advisor’s use of such models is dependent on the accuracy and reliability of the supplied data. Historical data inputs may be subject to revision or corrections, which may diminish data reliability and quality of predictive results. Changing and unforeseen market dynamics could also lead to a decrease in the short-term or long-term effectiveness of a model. Models may lose their predictive validity and incorrectly forecast future market behavior and asset prices, leading to potential losses. No assurance can be given that a model will be successful under all or any market conditions.
Sector Risk. If the Fund focuses its investments within a particular Sector, it is subject to increased risk. Performance will generally depend on the performance of the Sector, which may differ in direction and degree from that of the overall U.S. stock markets. In addition, financial, economic, business and political developments affecting the Sector may have a greater effect on the Fund than they would if the Fund did not focus on that Sector.

U.S. Government Obligations Risk. U.S. Treasury obligations are backed by the “full faith and credit” of the U.S. government and generally have negligible credit risk. However, due to fluctuations in interest rates, the market value of such securities may vary during the period shareholders own shares of the Fund. Securities issued or guaranteed by federal agencies or authorities and U.S. government-sponsored instrumentalities or enterprises may or may not be backed by the full faith and credit of the U.S. government. The Fund may be subject to such risk to the extent it invests in securities issued or guaranteed by federal agencies or authorities and U.S. government-sponsored instrumentalities or enterprises.

Underlying Fund Risk. Other investment companies, including ETFs (“Underlying Funds”), in which the Fund invests are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund will be higher than the cost of investing directly in the Underlying Funds and may be higher than other funds that invest directly in stocks and bonds. Each of the Underlying Funds is subject to its own specific risks.

Performance: Bar Chart and Average Annual Total Return Table: The bar chart and accompanying table shown below provide an indication of the risks of investing in the Fund by showing the total return for each full calendar year, and by showing how its average annual returns compare over time with those of a broad measure of market performance. How the Fund has performed in the past (before and after taxes) is not necessarily an indication of how it will perform in the future.

Updated performance information will be available at www.strategysharesetfs.com, or by calling (855) 4SS-ETFS or (855) 477-3837.

Annual Total Returns

During the period shown in the bar chart, the highest return for a quarter was 10.55% (quarter ended March 31, 2013), and the lowest return for a quarter was (-15.21)% (quarter ended December 31, 2018).

The Fund’s year-to-date return as of June 30, 2019 was 4.11%.

(1) After-tax returns are calculated using the highest historical individual federal marginal income tax rate and do not reflect the impact of state and local taxes. Actual after-tax returns depend on a shareholder’s tax situation and may differ from those shown. After-tax returns are not relevant for shareholders who hold Fund shares in tax-deferred accounts or to shares held by non-taxable entities.

Advisor: Rational Advisors, Inc. is the Fund’s investment advisor (the “Advisor”).

Sub-Advisor: Tuttle Tactical Management, LLC is the Fund’s investment sub-advisor (the “Sub-Advisor”).

Portfolio Manager: Matthew B. Tuttle, CFP, the Founder, Chief Executive Officer and Chief Investment Officer of the Sub-Advisor, is primarily responsible for the day-to-day management of the Fund’s portfolio. Mr. Tuttle has served as portfolio manager since 2016.

Purchase and Sale of Fund Shares: You may purchase and sell individual Fund shares on the NYSE Arca, Inc. (“Exchange”) through your financial institution on each day that the Exchange is open for business (“Business Day”). Because Fund shares trade at market prices rather than at their NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund only offers and redeems shares on a continuous basis on business days at NAV in large blocks of shares, currently 25,000 shares (“Creation Unit”). Creation Units are available for purchase and redemption on each Business Day. Generally, Creation Units are offered and redeemed on an in-kind basis. Except under limited circumstances, purchasers will be required to purchase Creation Units by making an in-kind deposit of specified instruments (“Deposit Instruments”), and shareholders redeeming Creation Units will receive an in-kind transfer of specified securities (“Redemption Instruments”). If there is a difference between the net asset value of a Creation Unit being purchased or redeemed and the Deposit Instruments or Redemption Instruments exchanged for the Creation Unit, the party conveying the instruments with the lower value will also pay to the other an amount in cash equal to that difference.

Tax Information: The Fund’s distributions generally are taxable as ordinary income or capital gains, except when your investment is through a tax advantaged account such as an Individual Retirement Account (IRA) or you are a tax-exempt investor.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Advisor and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
